

Shaokh Al Mahmud Shakhlyn

Software Engineer | TypeScript · React · Python · FastAPI · PostgreSQL · MongoDB

Dhaka, Bangladesh | +880 1521-211789 | shakhlyn.sh.du@gmail.com | linkedin.com/in/shakhlyn | github.com/shakhlyn

SUMMARY

Software Engineer with 2+ years building and maintaining enterprise web applications on distributed international teams. Strong in React and TypeScript module architecture, reusable frontend systems, REST API integration, and production debugging, with hands-on backend delivery in Python, FastAPI, PostgreSQL, and Keycloak. Owns features end to end, from requirements clarification through release.

PROFESSIONAL EXPERIENCE

Penta Global Limited — Software Engineer Mar 2024 – Present

Client Engagement — Yaana Solutions, Telecom Product Team Oct 2024 – Present

Embedded with Yaana's product team as a contracted engineer through Penta, collaborating directly with engineers, QA, BAs, product managers, UX designers, and technical leads across Bangladesh, India, and the US.

Deal Summary & Comparison — TypeScript, React, Django, REST APIs, Jinja, SCSS

- Built the platform's first deal summary and deal comparison capability, collapsing data previously spread across multiple tabs and compared by hand across two screens into one view — cutting review time ~50% and comparison effort ~95%.
- Owned frontend delivery from requirements clarification through release as the primary frontend contact for BA, product, UX, and QA on feature behavior, technical decisions, and defect resolution.
- Designed a reusable, configuration-driven table framework with dynamic columns, composable renderers, and cell-level customization, enabling complex comparison behavior without adding a third-party dependency.
- Built a Statement Comparison engine that normalizes nested datasets, splits mixed inbound/outbound records into direction-specific rows, supports separate and combined views, and surfaces deltas through row-level filtering and value-level highlighting.

Data Slicing — TypeScript, React, SCSS, REST APIs, jQuery

- Built a config-driven form input-validation engine, reusable across any React form by declaring per-field rules, with live/blur validation, touched-state tracking, and row-level errors in dynamic multi-row forms — no third-party dependency added.
- Developed multiple create/edit workflows with conditional fields, searchable and multi-select inputs, image previews, multipart uploads, and dynamic multi-row forms with add/remove operations.

Internal Product — Bhoganti Web App Aug 2024 – Nov 2024

- Built REST APIs with FastAPI and PostgreSQL, defining schemas and request/response models.
- Implemented Keycloak-based authentication and role-based authorization across backend endpoints and the React client.

TECHNICAL SKILLS

Languages:	TypeScript, JavaScript, Python, SQL, Bash
Frontend:	React, React Router, Redux Toolkit / RTK Query, Yup, jQuery, CSS, Tailwind CSS, Bootstrap, SCSS
Backend & Data:	FastAPI, Express.js, REST APIs, PostgreSQL, MongoDB, Jinja
Tools & Platforms:	Git, Linux, Keycloak, Postman, Vim, npm, Vite

PROJECTS

Meal Management System — React, TypeScript, RTK Query, Tailwind CSS | Node.js, Express, MongoDB, Mongoose, JWT, bcrypt

- Built a full-stack meal booking system with day-wise scheduling and server-side cancellation cutoffs, secured with JWT auth and bcrypt-hashed credentials.
- Automated the nightly booking cycle with a scheduled job that locks submissions past the cutoff and resets the dashboard for the next day.

Developer Tooling & Automation — Bash, Python

- Built a modular Linux setup system (~19 scripts) with distro-aware installers for Debian-based distros and Fedora, using idempotent operations and explicit failure handling — github.com/Shakhlyn/linux-setup-script
- Wrote supporting CLI utilities for local workflows, including a PDF-to-audio conversion pipeline and media download/extraction tooling.

EDUCATION

B.Sc. in Leather Products Engineering — University of Dhaka

2019

Transitioned into software engineering through independent study, practical projects, and professional product development.
